

DUOFIL – POLYESTER / COTTON CORESPUN THREAD

Premium Quality Polyester/Cotton Core Spun Soft Sewing Thread.

Made from High Tenacity Polyester Filament covered with cotton sheath during spinning, after which it is further dyed and twisted.

Major Advantages of using DUOFIL :

- Strengths of High Tenacity Polyester Filament and Softness and feel of Cotton on the seams.
- High resistance to Heat due to cotton cover.
- No Problem of Melting of threads on high speed machines.
- Very high resistance of seams to abrasion.
- High productivity due to excellent performance on sewing machine due to specially formulated micro-molecular lubrication.
- DUOFIL is available in wide range of shades. Current stock is available in the following :

Technical Information

Size	Tex	Ply/Count (Ne)	Strength (in Kg.)	Elongation (in %)	Needle Size		Presentation	
					Metric, Nm	Singer	Tubes/Reel	Cones
36	80	2/16s	3.5	18-20	100/120	16-19		4000 Mtr
25	120	3/16s	5.2	19-22	120/140	19-22		2500 Mtr
20	135	3/12s	6.2	19-22	130/160	21-23		1000 Mtr
15	180	5/16s	7.2	19-22	140/200	22-25		500 Mtr
8	300	6/12s	10	20-20	200/230	25-26		500 Mtr

Ticket No

36, 25, 20, 15, 8

Some Applications

Jeans, Mattresses, Tents and Awnings, Apron
Coats, Rucksacks, Canvas, Horse
Rugs, Trimming, Upholstery, etc..

Note: Other constructions are available on request
